

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants: [\[help\]](#)

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals: [\[help\]](#)

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements -that do not contribute meaningfully to the analysis of the proposal.

A. BACKGROUND [\[help\]](#)

1. Name of proposed project, if applicable: [\[help\]](#)

Demolition of a City of Shoreline listed historic inventory structure, a well water tank tower, located at 2433 NW 198th Street, Shoreline, WA 98177

2. Name of applicant: [\[help\]](#)

Matthew and Aimee Chew

3. Address and phone number of applicant and contact person: [\[help\]](#)

2129 234th Place SE, Bothell, WA 98021

4. Date checklist prepared: [\[help\]](#)

October 1, 2016

5. Agency requesting checklist: [\[help\]](#)
City of Shoreline Planning and Development

6. Proposed timing or schedule (including phasing, if applicable): [\[help\]](#)
Permits being submitted in November 2016. Anticipated 10 month construction period with completed home in December 2017.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. [\[help\]](#)
No

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal. [\[help\]](#)
There is no environmental information prepared for this proposal. A historical report was prepared for the City of Shoreline regarding the demolition of the out-of-service well water tower on the site.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. [\[help\]](#)
We do not know of any

10. List any government approvals or permits that will be needed for your proposal, if known. [\[help\]](#)
Permit approvals by the City of Shoreline to demolish a City of Shoreline listed historic inventory structure, well water tower located on the premise. In addition, permits will be requested to construct an approximate 3,700 square foot single family residence

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.) [\[help\]](#)
The proposal is to raze the existing approx. 1,000 square foot residence and an out-of-service wood two story well water tank tower and construct a new single family residence on a 60'x120' parcel in Richmond Beach/Shoreline, WA

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist. [\[help\]](#)
Property address is 2433 NW 198th Street in Shoreline, WA 98177. Tax parcel # 7277100005

B. ENVIRONMENTAL ELEMENTS [\[help\]](#)

1. Earth

a. General description of the site [\[help\]](#)

(circle one): Flat, rolling, hilly, steep slopes, mountainous,
other _____

Currently an approx. 1,000 square single family residence and a two story wood well water tower are on site. The lot is 6'-x120" relatively flat with a slight slope westerly toward Puget Sound. The perimeter of areas around the house is grass and a couple trees.

b. What is the steepest slope on the site (approximate percent slope)? [\[help\]](#)

On the most southwest corner of the property there is an approx. 20 degree slope toward the west.

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils. [\[help\]](#)

There is grass located around the house with little to no soil exposure currently on the property around the house.

NOT APPLICABLE

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. [\[help\]](#)

No

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill. [\[help\]](#)

Standard excavation for single family 3 story residential construction for foundation

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. [\[help\]](#)

See response "h"

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? [\[help\]](#)

The proposed project will meet City of Shoreline residential building requirements regarding impervious surfaces (i.e. driveway and garage)

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: [\[help\]](#)

The proposed project will have no impact as it will comply with all applicable provisions of Shoreline Municipal Code (SMC) Chapter 13.10 (Surface Water), Chapter 20.80 (Critical Areas Code), Best Management Practices, and general development standards in Chapter 20.50.

2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known. [\[help\]](#)

SEE RESPONSE TO "c" BELOW.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. [\[help\]](#)

NOT APPLICABLE

c. Proposed measures to reduce or control emissions or other impacts to air, if any: [\[help\]](#)

The proposed project will have no impact as it will comply with all applicable provisions of Washington DOE air quality regulations per Chapter 173-400 WAC; International Building and Fire Code provisions for the removal of hazardous and combustible materials (Section 3303); Puget Sound Clean Air Agency (PSCAA) regulations requiring reasonable precautions to minimize dust emissions from construction and demolition activity (Regulation I, Section 9.15), the best available measures to control the emissions of odor-bearing air contaminants from stationary equipment used for the construction activities (Regulation I, Section 9.11), PSCAA rules and best practices for mitigation of impacts from fugitive dust and other potentially hazardous demolition waste materials, such as lead, and PSCAA permit required for asbestos removal and includes survey and mitigation measures for dust control techniques and use of toxic air control technologies.

3. Water

a. Surface Water: [\[help\]](#)

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into. [\[help\]](#)

No

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. [\[help\]](#)

No

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material. [\[help\]](#)

NOT APPLICABLE

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. [\[help\]](#)

NOT APPLICABLE

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

[\[help\]](#)

No

- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. [\[help\]](#)

NOT APPLICABLE

b. Ground Water:

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

[\[help\]](#)

No

- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. [\[help\]](#)

NOT APPLICABLE

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow?

Will this water flow into other waters? If so, describe. [\[help\]](#)

NOT APPLICABLE

- 2) Could waste materials enter ground or surface waters? If so, generally describe. [\[help\]](#)

NOT APPLICABLE

- 3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

The current residential drainage patterns will be largely maintained in the new residence (i.e. to storm water or sewer). Runoff and drainage will meet all City of Shoreline requirements.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

The proposed project will comply with Best Management Practices included in the Department of Ecology Stormwater Management Manual for Western Washington providing stormwater pollution prevention measures as well as SMC Chapter 13.10 Surface Water Code which includes environmental & water quality protections.

4. **Plants** [\[help\]](#)

- a. Check the types of vegetation found on the site: [\[help\]](#)

☒ deciduous tree: alder, maple, aspen, other (1)

☒ evergreen tree: fir, cedar, pine, other (1)

- ☒ X shrubs
- ☒ X grass
- ☐ pasture
- ☐ crop or grain
- ☐ Orchards, vineyards or other permanent crops.
- ☐ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- ☐ water plants: water lily, eelgrass, milfoil, other
- ☐ other types of vegetation

b. What kind and amount of vegetation will be removed or altered? [\[help\]](#)

Two trees will be removed. One tree is not healthy, is damaged from a previous wind storm and poses a falling tree risk issue under high winds. The second tree will be removed to enable construction of the foundations for the new house.

c. List threatened and endangered species known to be on or near the site. [\[help\]](#)

None known

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any: [\[help\]](#)

The proposed landscaping around the residence will include grass, some bushes and plants

e. List all noxious weeds and invasive species known to be on or near the site.

None known

5. Animals

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site. Examples include: [\[help\]](#)

birds: hawk, heron, eagle, songbirds, other:

mammals: deer, bear, elk, beaver, other:

fish: bass, salmon, trout, herring, shellfish, other _____

None observed

b. List any threatened and endangered species known to be on or near the site. [\[help\]](#)

None known

c. Is the site part of a migration route? If so, explain. [\[help\]](#)

None known

d. Proposed measures to preserve or enhance wildlife, if any: [\[help\]](#)

Federal and state regulations provide protection for endangered species (16 U.S.C. §1531 et seq. and Chapter 77.12 RCW).

e. List any invasive animal species known to be on or near the site.

None known

6. Energy and natural resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. [\[help\]](#)

The proposed single family residence will use electric, natural gas

- b. Would your project affect the potential use of solar energy by adjacent properties?
If so, generally describe. [\[help\]](#)

No

- c. What kinds of energy conservation features are included in the plans of this proposal?
List other proposed measures to reduce or control energy impacts, if any: [\[help\]](#)

The residence will follow and meet City of Shoreline codes for energy regulations.

7. Environmental health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe. [\[help\]](#)

No

- 1) Describe any known or possible contamination at the site from present or past uses.

None known

- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None identified

- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

NOT APPLICABLE

- 4) Describe special emergency services that might be required.

None anticipated

- 5) Proposed measures to reduce or control environmental health hazards, if any:

The construction project will follow City of Shoreline regulations related to construction of a single family residence. Federal, state and regional regulations, as well as locally adopted Fire and Building Codes, are the primary means of mitigating risks associated with hazardous and toxic materials, such as WAC 365-230 Lead Based Paint Abatement.

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)? [\[help\]](#)

NOT APPLICABLE

- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site. [\[help\]](#)

Normal construction noises related to building a single-family residence. Construction will meet and follow any City of Shoreline regulations regarding noise.

- 3) Proposed measures to reduce or control noise impacts, if any: [\[help\]](#)

The proposed project will comply with SMC Chapter 19.05 Noise.

8. Land and shoreline use

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe. [\[help\]](#)

All adjacent and surrounding properties are used for single family residences. Proposal will not affect current land use on or nearby.

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use? [\[help\]](#)

No known farmland or working forest on the property.

- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No

- c. Describe any structures on the site. [\[help\]](#)

A single-family residence approximately 1,000 square feet. A wood two-story out-of-service well water tank tower.

- d. Will any structures be demolished? If so, what? [\[help\]](#)

Yes

- e. What is the current zoning classification of the site? [\[help\]](#)

R6

- f. What is the current comprehensive plan designation of the site? [\[help\]](#)

Unknown

- g. If applicable, what is the current shoreline master program designation of the site? [\[help\]](#)

Not Applicable

- h. Has any part of the site been classified as a critical area by the city or county? If so, specify. [\[help\]](#)

Unknown

- i. Approximately how many people would reside or work in the completed project? [\[help\]](#)
6
- j. Approximately how many people would the completed project displace? [\[help\]](#)
0, the current residence is not occupied
- k. Proposed measures to avoid or reduce displacement impacts, if any: [\[help\]](#)
NOT APPLICABLE
- L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any: [\[help\]](#)
Per City of Shoreline the proposed project will comply with Zoning and Development standards, Design and Construction Standards, and Critical Areas code which address the scale of development and other aspects related to compatibility, environmental protection and uses.
- m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any:
NOT APPLICABLE

9. Housing

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing. [\[help\]](#)
NOT APPLICABLE
- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing. [\[help\]](#)
NOT APPLICABLE
- c. Proposed measures to reduce or control housing impacts, if any: [\[help\]](#)
The proposed project will comply with zoning and development standards, which provide for a broad range of housing types in the City, zoning for a range of densities, and flexible development standards to achieve the allowable density. Design and transition criteria provide for compatibility.

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed? [\[help\]](#)
Approximately 35 feet per City of Shoreline R6 zoning codes
- b. What views in the immediate vicinity would be altered or obstructed? [\[help\]](#)
The residences directly adjacent may have some views impacted.
- c. Proposed measures to reduce or control aesthetic impacts, if any: [\[help\]](#)
NOT APPLICABLE

11. Light and glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur? [\[help\]](#)

NOT APPLICABLE

- b. Could light or glare from the finished project be a safety hazard or interfere with views? [\[help\]](#)

NOT APPLICABLE

- c. What existing off-site sources of light or glare may affect your proposal? [\[help\]](#)

NOT APPLICABLE

- d. Proposed measures to reduce or control light and glare impacts, if any: [\[help\]](#)

The proposed project will have no impact as it will comply with all applicable standards per SMC 20.50 for screening and landscaping, shading of lighting, and performance standards related to glare provide mitigation.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity? [\[help\]](#)

NOT APPLICABLE

- b. Would the proposed project displace any existing recreational uses? If so, describe. [\[help\]](#)

NO

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any: [\[help\]](#)

NOT APPLICABLE

13. Historic and cultural preservation

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe. [\[help\]](#)

Yes, there is a two-story wood tower that sits over a water well. This tower was built in 1916 and was formerly used to house a water well tank (no longer exists) to gravity feed potable water to the residence located on an adjacent property. The tower was listed on the City of Shoreline historic inventory.

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources. [\[help\]](#)

No evidence observed

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of

archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.
[\[help\]](#)

A historical research report was prepared as part of a demolition permit submission per the City of Shoreline requirements. See attached report in Appendix A.

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

Per City of Shoreline requirements the historical report was prepared to formally document the historical background of the structure. The report will be kept on archive with the City of Shoreline and the Richmond Beach Historical Society. The water tower will be razed to allow for construction of a single family residence on the property.

14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any. [\[help\]](#)

The property sits east off of NW 198th in Shoreline, WA and has direct access from the street.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop? [\[help\]](#)

No. The closest bus service stop is 2-3 blocks away.

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate? [\[help\]](#)

No additional. The existing residence to be razed has 2 carport parking spots. The proposed residence will have a 2 car garage.

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private). [\[help\]](#)

No

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe. [\[help\]](#)

No

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates? [\[help\]](#)

Standard owner occupied traffic leaving to go to work and returning home daily

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No

h. Proposed measures to reduce or control transportation impacts, if any: [\[help\]](#)

The proposed project will have no transportation impact as the use is not changing and it will comply with all applicable parking standards per SMC Chapter 20.50.

15. Public services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe. [\[help\]](#)

No

- b. Proposed measures to reduce or control direct impacts on public services, if any. [\[help\]](#)
NOT APPLICABLE

16. Utilities

- a. Circle utilities currently available at the site: [\[help\]](#)
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,
other _____

The current residence has electricity, public water, telephone, sewer, refuse service.

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. [\[help\]](#)

All utilities will be reconnected plus natural gas service

C. SIGNATURE [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee Matthew K. Chew

Position and Agency/Organization _____

Date Submitted: _____

D. SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS [\[help\]](#)

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

Proposed measures to avoid or reduce such increases are:

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

3. How would the proposal be likely to deplete energy or natural resources?

Proposed measures to protect or conserve energy and natural resources are:

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Proposed measures to protect such resources or to avoid or reduce impacts are:

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
